

Real assets. A connected future.

ALFA is the planned utility token for the Al Furqan ecosystem, connecting aviation, agriculture, healthcare and green energy with a proposed ALFA Debit experience.

1B

Proposed token supply

BSC

Planned blockchain

4 sectors

One ecosystem vision

Aviation

105 training aircraft in the proposed pipeline; H145 and H160 leasing opportunities; documented Al Furqan-Vman partnership.

Agriculture & energy

Hola bamboo, Mwenezi lucerne, Tana River Napier-to-CBG and the DZF Benin wheat-and-pasta proposal expand the project landscape.

Healthcare & ALFA Debit

Medical aviation and infrastructure form the healthcare vision. ALFA Debit is planned as an ALFA-funded Visa card programme, subject to issuer arrangements.

Project proposals and organisational track records do not establish ALFA ownership, token collateral or guaranteed returns. Allocation, contract, vesting and launch terms remain under development.
